

1. Check the fitment of the part with the bumper.

2. Using included degreasing cloth clean the surface as shown in picture 3.

3. Remove the foil from double sided tape.

4. Place the part into the bumper applying pressure, so the tape sticks properly.

5. Drill holes as shown in pictures 5, 8 and 10.

6. Use included hardware to secure the part to the bumper.

Picture 12 shows the location of the screws.
